New Form Response

Form: [Written Submissions Form](#)

A new response was submitted on 27 May 2024, 05:15 PM.

First Name *	Kevin
Last Name *	McCubbin
Email *	[REDACTED]
Phone *	[REDACTED]
City/Town *	Calgary
Please make your written submission here: *	Above all, employers and private businesses open to the public should be prohibited from collecting medical information (i.e. vaccine status) from employees or members of the public. Under current PIPA legislation, employee medical disclosures are voluntary only, this should remain. Our province should be 100% free of coercive medical mandates and associated data schemes. Secondly, as far as I am concerned, biometric data should be completely outlawed. If AI is such a security threat, then e-commerce should be eliminated, and all banking should revert to in-person, in branch, with more reliance on cash, bank drafts, and money orders, just like the old days.
